

H O P E S 2 3

H.O.P.E.S. is an annual student-run conference, held every spring by the Ecological Design Center at University of Oregon. The event is an opportunity for students, faculty, community members and visiting scholars to discuss the relationship between ecology, various design disciplines, and how their collaboration can produce innovative solutions to contemporary issues.

Today we are witness to the global displacement of resources, populations, and natural rights. As ideas and objects are shifted by human forces, their movements generate unforeseen impacts and leave vulnerable spaces behind. We are culpable actors in this system and must reevaluate our ability to adapt to social, environmental, and economic displacement. Where do we intervene amid these conditions of change, and how do we harness the opportunities of displacement to cultivate more resilient systems?

DISPLACEMENT

General Meetings

Join us at 6 pm

2/15/17	LA206
2/22/17	LA405
3/1/17	LA206
3/8/17	LA206
